TRADEMARKS ACT 2019

[Section 10; Regulation 6]

NORT No: 58/01NRUTM/2026

NOTICE OF APPLICATION FOR REGISTRATION OF TRADEMARK

The Registrar of Trademarks has received an application for registration of trademark as follows:

(a) **Applicant's full name:** EUTELSAT S.A.

(b) **Address of the applicant:** 32 Boulevard Gallieni, 92130 Issy-les Moulineaux,

France

(c) **Date application lodged:** 27 July 2026

(d) **Time application received:** 11:20am

(e) **Reference number for the application:** 58/01NRUTM/

(f) **Representation, drawing or design of mark:**

Word:

EUTELSAT

(g) Goods or services for which the trademark is associated with:
International Class:

Class 9: Scientific apparatus and instruments; Satellites; Satellites for scientific purposes; Telecommunications satellites; Apparatus and instruments for receiving, transmitting and decoding satellite signals; Satellite transceivers; Television transmitters; Channel converters for television; Relays for radio and TV stations; Telecommunications networks; Aerials; Aerials for telecommunications networks; Telecommunications network management installations; Apparatus for recording, transmission, processing and reproduction of signals, sound, images or data; Television decoders; Video screens; Tablet computers; Telephone apparatus; Monitors; Apparatus for data, sound and image capture; Media for magnetic and optical data, and in particular for database data; Integrated circuit cards [smart cards]; Magnetic encoders; Intercommunication apparatus; Optical readers; Data processing equipment; Computers; Computer servers; Computer, data transmission and telephone terminals; Modems; Computer peripheral devices; Video multiplexing apparatus; Software; Downloadable software applications; Computer software for use in telecommunications; Computer software for transmission of sound and video messages; Computer software for data and document capture, transmission, storage and indexing; Computer software for database management; Software for providing access to computer

or data transmission networks, in particular to a global communications network (such as the Internet); Digital solutions provider [DSP] software; Software for diagnostics and troubleshooting; Computer software for use as an application programming interface [API]; Software for managing networks; Downloadable computer software for remote analysis and monitoring; Computer software platforms, recorded or downloadable; Connectors to a computer network or telephone network; Transmitting and receiving apparatus for data processing and communications; Transmitters of electronic signals; Computer database servers; Electronic publications, downloadable.

Class 38: Telecommunication services; Communication services by satellite; Communications via fibre optic networks; Communication via computer terminals, in particular the internet, extranets and intranets; Communications by telephone; Communication services for the internet of things [IoT]; Telecommunications routing and junction services; Computer transmission by electronic means of industrial, commercial, advertising, educational and recreational information and programs; Computer aided transmission of messages and images; Computer-aided transmission and dissemination of data, sound and images; Transmission of information by data transmission; Television and radio broadcasting; Television broadcasting; Live television transmissions; Cable television broadcasting; Broadcasting of television programs by subscription; Radio broadcasting; Transmission of electronic mail; Electronic mail and dissemination of information by electronic means; Transmission of messages via a direct link with one or more satellites; Television broadcasting, communication and transmission of data via satellite; Streaming of data; Transmission of sound, images, signals and data via satellite, via cable or via an interactive network; Transmission of encrypted communications; Electronic transmission of data with an encryption and decryption function; High-speed data transmission for telecommunications network operators; Transmission of interactive television program guides; Providing telecommunications connections to a global computer network; Radio communications; Internet services providers (isps); Access to computerised or data transmission databases and computer database servers; Provision of access to data on communication networks; Providing access to electronic communications networks; Providing user access to portals on the Internet; Providing wireless telecommunications via electronic communications networks; download of computer software updates intended for telecommunications networks; Providing of information relating to telecommunications and broadcasting of television programs; Telephone assistance relating to telecommunications for users of telecommunications apparatus, devices and installations; Dissemination (transmission) of computer software updates for telecommunications; Providing access to and leasing access time to computer networks; Leasing satellite transmission capacity; Rental of satellite broadcasting sets; Professional consultancy (connected with telecommunications), not relating to the conduct of business; Leasing access time to a computer database server, including for world-wide communications networks (such as the Internet).

Class 42: Development of data transmission systems; Design and development of wireless data transmission apparatus; Computer software design, Design, development and maintenance of computer software; Design and development of computer hardware; Design and development of telecommunications networks; Design and development of wireless computer networks; Studies, technical advice, expert opinions, and drafting of projects and plans in the field of telecommunications and computer or data transmission networks (engineering); Engineering services in the field of communications technology; Technical services (engineering) relating to the launch of satellites, the operation thereof, the recovery thereof and the repair thereof in orbit or for the purposes of placing them in orbit; Computer programming; Maintenance and updating of software for communication systems; Installation, maintenance, updating and repair of databases, database servers, computers providing access to computer or data transmission networks; Provision of data centre facilities; Providing temporary use of non downloadable computer software; Analysis of telecommunication signals; Technical design of

telecommunications equipment and apparatus; Conducting technical project studies; Surveying [engineering]; Technical research; Scientific and industrial research relating to new information, computer and communications network, communications and virtual and interactive image technologies; Computer rental; Server hosting; Cloud hosting provider services; Hosting of digital content; Hosting the websites of others.; hosting of computer platforms; Platform as a service [PaaS] featuring computer software platforms for the transmission of images, audiovisual content, video content and messages; Infrastructure as a service [IaaS] as hosting computer software platforms for the operation of cloud servers intended for use by others; Cloud storage services for electronic data; Encryption, decryption and authentication of information, messages and data; Provision of technical consultancy (advice) in the field of telecommunications; Technical assistance for improving the conditions of use of apparatus for recording, reproduction or processing of data, sound and images, telecommunications terminals, and database servers, and for monitoring and efficiency of the aforesaid apparatus and instruments; Technical support services namely Troubleshooting in the nature of diagnostics of computer hardware and software problems; Electronic monitoring services, namely Computer security services for blocking illegal network access; Data security services; Automated remote backup for voice and data systems of telecommunications installations; Testing of telecommunications apparatus, devices and installations; Remote diagnostics of operating incidents occurring on telecommunications apparatus, devices and installations; Disaster recovery services (restoration) for data communications systems; corporate risk management services in the field of computer networks (IT security).

Priority Claimed:
